DETAILED ACTION

Claims 1, 5-8, 11-18, 22, 23 and 27-29 are pending in this application.

Action Summary

1. Examiner acknowledges the cancellation of claim 2-4 and 21. Therefore, any and all rejections and/or objections directed towards them are hereby withdrawn.
2. The rejection of claims 1, 5 and 6 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 14, 16 and 18 of US Patent No. 5,665,332 is being maintained for the reasons stated in the previous office action dated July 21, 2004.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 5-8, 11-18, 22, 23 and 27-29 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable

Art Unit: 1616

over claims 1-8 are 11-18 of copending Application No. 10/405,100. Although the conflicting claims are not identical, they are not patentably distinct from each other because both copending applications are directed to a system of delivering a chemical agent in the form of a spray or stable foam. The only difference between the two-copending applications is the recitation of instant application which is the limitation that the formulation is stored as a single composition. While it is not specifically taught in 10/405,100, that the composition is stored as a single composition, the claim language is broad enough to encompass all storage types i.e. single compartment, dual compartment, etc.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

4. Claims 1, 5-8, 11-18, 22, 23 and 27-29 are rejected.
